**NOTICE OF INTENTION TO MAKE REGULATIONS SETTING OUT LICENCE
CONDITIONS FOR SPECTRUM USE LICENCES**

The Communications Regulatory Authority of Namibia, in terms of regulation 4(3) of the Regulations Regarding Rule-Making Procedures published as General Notice No. 334 of 17 December 2010 -

1. publishes this notice of intention to make Regulations Setting Out Licence Conditions for Spectrum Use Licences as set out in Schedule 1;
2. set out the concise statement of the purpose for the proposed Regulations in Schedule 2.

The public may make oral submissions on the proposed regulations to the Authority, at a time, date and place notified by the Authority by subsequent notice in the *Gazette*.

The public may also make written submissions to the Authority within thirty (30) days from the date of publication of this notice in the *Gazette*, in the manner set out below for making written submissions.

Reply comments to written submissions may be submitted to the Authority-

- (a) within a period of fourteen (14) days from the date of notification of written comments by the Authority; or
- (b) If the opportunity for the submission of reply comments is published in a subsequent *Gazette*, after the lapse of fourteen (14) days from the date of such publication.

¹ Subject to section 46(2) of the Communications Act, No 8 of 2009.

All written submissions must -

- (a) contain the name and contact details of the person making the written submissions and the name and contact details of the person for whom the written submission is made, if different; and
- (b) be clear and concise.

All written submission must send or given in any of the following manner:

- (a) by hand to the head offices of the Authority, namely Communication House, 56 Robert Mugabe Avenue, Windhoek;
- (b) by post to the head offices of the Authority, namely Private Bag 13309, Windhoek 9000;
- (c) by electronic mail to the following address: legal@cran.na; and
- (d) by facsimile to the following facsimile number: +264 61 222490.

L. N. JACOBS
CHAIRPERSON OF THE BOARD
COMMUNICATIONS REGULATORY AUTHORITY

SCHEDULE 1

REGULATIONS SETTING OUT LICENCE CONDITIONS FOR SPECTRUM USE LICENCES: COMMUNICATIONS ACT, 2009

The Communications Regulatory Authority of Namibia, in terms of section 101 of the Communications Act, 2009 (Act No. 8 of 2009) intends to make Regulations Setting Out Licence Conditions for Spectrum Use Licences.

1. Definitions

In these regulations, any word or expression to which a meaning is assigned in the Act, shall have the same meaning and –

“Act” means the Communications Act, 2009 (Act No. 8 of 2009).

2. Purpose

These regulations impose conditions on spectrum use licensees in addition to the conditions imposed by the Act.

3. Applicability

These regulations are applicable to all spectrum use licences issued in terms of section 101 of the Act and to persons that may provide telecommunications services without a licence as in regulation 5(2) of the Regulations Setting out Broadcasting and Telecommunications Service Licences Categories, published in Government Gazette No. 4714, Notice 124, dated 18 May 2011 (As amended in Government Gazette No. 5148, Notice No. 74, dated 13 March 2013).

4. Authorisation

1. All spectrum use licensees are duly authorised to use frequencies assigned in terms of section 101 of the Act and the “Regulations Regarding Licensing Procedures for Telecommunications and Broadcasting Service Licences and Spectrum Use Licences”, in Government Gazette No. 4785, Notice No. 272, dated 29 August 2011, as maybe amended from time to time.
2. The spectrum use licence certificate (as contained in “Annexure A”) shall not confer any ownership rights of the frequency indicated on the licence, but only give the licensee a right of use.
3. The Authority may request a licensee to prove that the allocated frequency is been used efficiently. After considering such a written report from a licensee, the Authority may revoke a spectrum licence issued, should it be deemed that the licensee is hoarding spectrum or not using it efficiently.

5. Spectrum Use Licence Area

The spectrum use licence area is the Republic of Namibia or any specific geographical area as specified on spectrum use licence certificate and/or annexes attached to the spectrum use licence certificate in the Republic of Namibia.

6. Duration of spectrum use licences

1. In terms of sections 38, 86 and 101, the authorisation to utilise spectrum stipulated in a spectrum use licence shall automatically expire on 31 December of every calendar year, without prior written notice.
2. Licensees shall apply to renew their licences, on a form provided by the Authority, within two (2) months prior to the expiry of the spectrum use licence in terms of sections 101 (14) of the Act.
3. In terms of section 42(3) and 88 of the Act, in the event that the licensees fails to pay licence fees payable, the Authority may declare the licence to be forfeited in which case no licence renewal will be issued.
4. The licensee must utilise the spectrum use licence/s awarded within six (6) months from date of issuance. Failure to do so will result in forfeiture of the licence to the Authority with immediate effect on the last day of the six (6) month period
5. In respect of (3) and (4) above, the Authority may, after considering a written request from a licensee, extend, in writing, for such further periods, as may be determined by the Authority and, if applicable, condone the licensee’s failure to utilise the assigned frequency or pay the licence fees, as the case may be, in which event the licence will lapse at the expiry of such extended period.

7. National Spectrum Band Plan

The spectrum use licensees shall comply with the International Telecommunication Union’s regulations as set out for Region 1 indicated in the national spectrum band plan, as prescribed in terms of section 100 of the Act and any amendments that are made thereto from time to time.

8. Technical conditions

The licensees shall comply with the technical conditions as will be prescribed in terms of sections 38, 43, 44, 45, 80, 86, 100 and 101 of the Act and the Regulations Regarding Licence Exempt Spectrum, published in Government Gazette No. 4839, Notice No. 395, dated 25 November 2011, as may be amended from time to time, as well as any specific terms and conditions contained in the licence issued.

9. Payment of Spectrum Use Fees

1. Subject to regulation 6 of the “Regulations Regarding Licensing Procedures for Telecommunications and Broadcasting Service Licences and Spectrum Use Licences”, published in Government Gazette No. 4785, Notice No. 272, dated 29 August 2011, as may be amended from time to time, spectrum use licences shall only be awarded after payment of the applicable fees to the Authority.
2. Spectrum use licence fees for renewal of existing spectrum use licence shall be payable by 31 January of every calendar year.
3. The Authority must issue an invoice to the licensee and a receipt upon receipt of the verified and correct payment.
4. The Authority will issue a renewal letter, after proof of payment of the annual licence fee.

10. Amendment, renewal or modification of licence

1. For the amendment or renewal of a licence, the licensee shall comply with the “Regulations Regarding Licensing Procedures for Telecommunications and Broadcasting Service Licences and Spectrum Use Licences”, published in Government Gazette No. 4785, Notice No. 272, dated 29 August 2011, as may be amended from time to time.
2. The Authority retains the right to modify a licence in terms of Section 101 (13) of the Act following due process as set out in the “Regulations Regarding Licensing Procedures for Telecommunications and Broadcasting Service Licences and
3. Spectrum Use Licences”, published in Government Gazette No. 4785, Notice No. 272, dated 29 August 2011, as may be amended from time to time.

11. Reporting, monitoring and compliance

1. The Authority may request any information in the format determined by it as relevant from the licensees for the purposes of monitoring and ensuring compliance with the Act and the regulations prescribed by the Authority, to which request the licensee shall comply in the manner set out by the Authority.
2. The Authority may, in the course of carrying out its obligations under the Act require a Licensee to provide information, so as to enable it to:
 - a. Monitor and enforce consumer protection, quality of service, compliance with licence conditions and other requirements of the Act and applicable regulations;
 - b. Facilitate efficient use of scarce resources (spectrum); and
 - c. Collect and compile information to be used for the purpose of sectoral analysis, planning, reporting and conducting inquiries.

3. In respect to each request for information referred to in sub-clause (2)(c), except where otherwise addressed in applicable regulations, the Authority will provide a detailed specification of its information request, applicable response times and identify a contact person to whom queries may be addressed.
4. All licencees are obliged to submit on a bi-annual basis in March and November of every calendar year a report to the Authority specifying the following information –
 - a. Location and coordinates of each site;
 - b. Spectrum and technology utilized at each site; and
 - c. Power output of transmitters installed at each site.

12. Universal Services and Access

Spectrum use licensees may be granted universal service obligations in regard to the utilisation of assigned frequencies in the manner as prescribed by the Authority in terms of relevant legislation and regulations, in the manner as set forth by the Authority, from time to time.

13. Regulatory offences

The Authority will prosecute regulatory offences and enforce these licence conditions in terms of sections 114 and 115 of the Act.

14. Revocation of licence

The licence may be revoked in terms of sections 42 and 115 of the Act and section 4 of the licensing conditions as may be applicable.

15. Amendment of licence conditions

The Authority may amend these conditions from time to time in terms of the rule-making regulations.

16. Supervision by authority

The Authority shall supervise compliance with these conditions in terms of sections, 114 and 115 of the Act.

“Annexure A”**SPECTRUM USE LICENCE**

The right to use the radio frequencies contained in **“Annexure A”** attached hereto, is conferred to:

in terms of section 101 of the Communications Act, 2009 (Act No. 8 of 2009), and the Regulations Regarding Licensing Procedures for Telecommunications and Broadcasting Service Licences and Spectrum Use Licences, as published in Government Gazette No. 4785, Notice No. 272, dated 29 August 2011.

The license is issued subject to the Communications Act, regulations made in terms of the Communications Act and conditions for Spectrum Use Licences to be published in terms of the Regulations Regarding Rule-Making Procedure.

It may however, be suspended or cancelled at any time by the Authority in terms of the Communications Act and applicable Regulations. The licence expires on 31st December each year. The Authority will issue a renewal letter, after proof of payment of the annual licence fee.

DATE OF ASSIGNMENT OF FREQUENCY:**SCHEDULE 2****PURPOSE OF THE PROPOSED REGULATIONS SETTING OUT LICENCE
CONDITIONS FOR SPECTRUM USE LICENCES: COMMUNICATIONS ACT, 2009**

- i. In terms of section 101 of the Act, the Authority may issue spectrum use licences and as such conditions as it may determine. The purpose of the proposed regulations is to set out standard conditions for spectrum use licences.

COMMUNICATIONS REGULATORY AUTHORITY OF NAMIBIA

No. 166

2013

**REGULATIONS SETTING OUT THE FREQUENCY CHANNELING PLAN FOR
DIGITAL TERRESTRIAL TELEVISION: COMMUNICATIONS ACT, 2009**

The Communications Regulatory Authority of Namibia, in terms of section 100 (6) of the Act and the Regulations Regarding Rule-Making Procedures: Communications Act, 2009 published as General Notice No. 334, in Government Gazette No. 4630 dated 17 December 2010, hereby publishes these Regulations Regarding the Frequency Channeling Plan for Digital Terrestrial Television, which will be in force, effective from date of publication in the *Gazette*.

Definitions

1. In these regulations, any word or expression to which a meaning is assigned in the Act, shall have the same meaning and-

“Act” means the Communications Act, 2009 (Act No. 8 of 2009).

Purpose

2. These regulations set out the Frequency Channeling Plan for Digital Terrestrial Television in terms of section 100 of the Act.

Applicability

3. These regulations are applicable to all Broadcasting Service Licensees, as contained in the Regulations Setting Out Broadcasting and Telecommunications Service Licence Categories as amended in Government Gazette No. 5148, Notice No. 74, dated 13 March 2013, providing or intending to provide Digital Terrestrial Television.

Table of Frequency Allocations

4. The table of frequency allocations sets out Digital Terrestrial Television allocations for Namibia adopted by the Revised ITU Regional Radio Communication Conference in 2006 (GE06 Plan) for terrestrial television broadcasting in bands ranging from 174 MHz to 230 MHz and 470 MHz to 694 MHz.

L. N. JACOBS
CHAIRPERSON OF THE BOARD
COMMUNICATIONS REGULATORY AUTHORITY

COMMUNICATIONS REGULATORY AUTHORITY OF NAMIBIA

No. 167

2013

DETERMINATION OF DOMINANT POSITION
TELECOMMUNICATION SERVICE LICENCES

The Communications Regulatory Authority of Namibia, in terms of section 78 of the Communications Act, 2009 (Act No. 8 of 2009) herewith gives notice of determination of dominance in the telecommunications market and publishes this;

- (a) Study of determination of dominant position as set out in schedule 1; and
- (b) Notice of determination of dominant position in the telecommunications market.

L. N. JACOBS
CHAIRPERSON OF THE BOARD
COMMUNICATIONS REGULATORY AUTHORITY

SCHEDULE 1

STUDY OF DETERMINATION OF DOMINANT POSITION

The Communications Regulatory Authority of Namibia, in terms of section 78, read with section 129 of the Communications Act herewith gives notice that the following is the determination of dominance in the telecommunications market in Namibia.

Definitions

1. In this notice, any word or expression to which a meaning is assigned in the Act, shall have the same meaning and –

“Act” means the Communications Act, 2009 (Act No. 8 of 2009).

Introduction

2. In terms of section 78 of the Act, the Authority must hold a hearing within one year from the date of commencement of the Act, in order to determine which telecommunications licensees hold a dominant position in the market. Prior to initiating the hearing process, the Authority’s view was to include the broadcasting sector in the hearing. The Authority published a notice of intention to hold the hearing in Government Gazette No. 4905,

Notice No. 62, dated 20 March 2012. Attached to the notice was a discussion paper, titled 'Telecommunication Market Study and Dominance' setting out some of the issues that the Authority would consider during the hearing. The notice further invited the public to submit comments and all telecommunications and broadcasting licensees to submit audited financial statements for the most recent year end, by no later than thirty calendar days from date of Notice. In Government Gazette No. 4938, Notice No. 109, dated 27 April 2012, the Authority gave notice of the hearing, which was held on 11th May 2012.

Telecommunications market study and dominance

3. In the discussion document, the Authority highlighted the specific provisions of the Act, which require prescription of regulations and imposition of obligations in respect of dominant licensees. The main aim of these provisions is to promote competition by leveraging Namibia's infrastructure given Namibia's small population, limited resources and small market size. The intent is to let existing networks be used by competitors to avoid duplication while achieving the highest level of competition. The document also listed the sections of the Act that allow special regulatory treatment of dominant licensees.

While acknowledging that there is no universally accepted definition of dominance, the Authority made a jurisdictional comparison in assessing the concept. It also had regard to the Competition Act, 2003 (Act No. 2 of 2003), which, in section 25, stipulates that the Commission must prescribe criteria to be applied in determining whether an undertaking has, or two or more undertakings have, a dominant position in a market, which may be based on any factors that the Commission considers appropriate.

The document then focused on section 78(4) of the Communications Act, which sets out the criteria to be used by the Authority in determining dominance, which states as follows:

"Subject to subsection (5), the Authority must find a licensee to be dominant if it is of the opinion that –

(a) the licensee in question has such a share of the market in the class of telecommunications services in question, that it is able to act independent of its competitors;

(b) the licensee controls some infrastructure that is necessary for the provision of the services in question;

(c) the licensee in question is dominant as provided in paragraph (a) or (b) in respect of a class of related services (which need not be telecommunications services) and the licensee can use that dominance to exercise power in the market for the telecommunications services in question; or

(d) the licensee in question has a position in a market in another country or a relationship with providers in another country that can be used to exercise market power in respect of the relevant class of telecommunications services in Namibia."

Section 78(5) further provides that the Authority must consider the market power that may be exercised by a competitor of the licensee concerned in order to determine whether any of the matters referred to in subsection 4 will give the licensee concerned market power.

Section 78(5) therefore, means that if, for example, A and B are competitors, with 35% and 65% of market power, respectively, in considering whether A is dominant in respect of any of the categories in section 78(4), we must have regard to A's competitor (i.e. B's) market power of 65%. Therefore, a licensee's market power is relevant in the application of the criteria in section 78(4) and also in determining the extent of a competitor's market power.

In view of the above provision, the Authority suggested the following definition of market power based on section 78(4) of the Act:

A licensee is dominant in a market if:

- It has at least 35% of market share based on revenues;
- It controls some infrastructure that is necessary for the provision of the services in question;
- It has less than 35% market share but has dominance in a related market and therefore is able to exercise power in the market for the services in question; or
- It has less than 35% market share but has a position in a market in another country or a relationship with providers in another country that can be used to exercise market power in respect of the relevant class of services in Namibia.

The document also focused on the definition of markets and suggested the following principles for defining markets:

- effective in implementing the objectives of the law;
- practical to implement and measure;
- minimize reporting burden for licensees; and
- suitable for a converged ICT sector based on technological and service neutral regulation.

From the principles, the following five approaches can be deduced and briefly summarized as follows:

Approach 1: Service and technological neutral market definition

In terms of this approach, the Authority will be issuing service and technology neutral telecommunications licenses for telecommunication licensees. The convergence of voice and data services as well as the mix in technologies (mobile, fixed, fixed wireless) should bring more competition and new products and services to the Namibian market. This requires market definitions that will stand up to the changes that this new converged environment will bring. In terms of this approach, dominance should be based on the revenue shares of all licensees.

Approach 2: Technology neutrality (but not service neutrality)

A further approach could be to define markets based on technological neutrality i.e. voice and data, but not distinguishing between mobile, fixed or fixed wireless. For broadcasting there would still only be one market. This market definition does, however not improve the ability of the Authority to implement the objectives of the Act compared to the single telecommunications market. The same licensees would be declared dominant.

Approach 3: Service and technological neutrality but distinguished by distribution channel

A further approach could be to define markets based on service and technological neutrality but distinguishing by distribution channels i.e. retail and wholesale markets. The Authority currently does not have revenues broken down by retail and wholesale. It must be noted however, that this market definition does not improve the ability of the Authority to implement the objectives of the Act compared to the first approach and is not suitable for the broadcasting sector.

Approach 4: Demand –side and supply side substitutability

A much more sophisticated and complex process would be to define markets based in customer and supplier substitutability.

- Demand-side substitutability: measures the extent to which customers are prepared

or able to substitute other telecommunications services for the telecommunications services under consideration.

- Supply-side substitutability: measures the extent to which suppliers are able to supply other telecommunications services under consideration.

Given that these more sophisticated market definitions would not increase the Authority's ability to safeguard fair competition, it would not be an advisable route.

Approach 5: Based on license categories

The Authority has published Regulations Setting out Broadcasting and Telecommunications Service License Categories, in Government Gazette No. 4714, Notice No. 124, dated 18 May 2011.

In terms of this approach, all licensees with an ECNS and ECS licence falls into the ECNS market and a licensee with a signal distribution and a commercial, community or public licence falls into the Broadcasting Network market. This is because it is difficult for the Authority to separate revenues by licence. In conclusion, it was recommended that the approach that minimises the burden on the licensees and the Authority while allowing the Authority to implement the objects of the Act is approach 1.

Public Comments

4. In response to the Notice in the *Gazette*, the comments that were submitted are summarized below based on written submissions and the hearing transcript.

4.1 Multichoice Namibia (Pty) Ltd

The purpose of section 78 is for the Authority to conduct a hearing to determine which telecommunications licensees are dominant in the market. Once this process is completed, the Authority may then impose certain *ex ante* requirements on those telecommunications licensees, which have been found to be dominant.

Further that *ex ante* prohibitions may be imposed on dominant telecommunications licensees and then in very limited circumstances to broadcasting licensees in terms of section 33, which deal with *ex post* regulation.

Multichoice Namibia (Pty) Ltd also indicated that section 78 is in chapter 5 of the Act, which is headed '*Telecommunications Services*' and for purposes of section 78 licence means the telecommunications licensee and is not applicable to broadcasting.

In interpreting the application of section 78, Multichoice Namibia (Pty) Ltd further distinguished between *ex ante* and *ex post* regulation. An enquiry in terms of section 78 is *ex ante* regulation. *Ex post* regulation on the other hand does not set up any rules in advance, and does not require any findings, for example of dominance. What it requires is, at a particular point in time where there is an allegation of an abuse of dominance as contemplated in section 33(2), is for the Authority to identify whether the person concerned is dominant in that market and whether they have abused their dominant position in that market.

Further that section 38(11) allows the Authority to impose specific obligations on a licensee when the licensee has a dominant position in relation to the provision of any class of telecommunication services and there is no equivalent provision for broadcasting services.

4.2 Mobile Telecommunications Limited

The idea is to divide the markets; telecommunication and broadcasting markets and then analyse the four criteria and take into account the market power exercised by the competitors. The test is then whether that power is exercised and if yes, there will be obligations on the dominant licensee.

Mobile Telecommunications Limited's benchmark is showing that from Europe and Africa the relevant markets defined by the national regulators vary between countries, however all regulators that perform market analysis have defined relatively narrow markets and at least five separate relevant telecommunications markets.

Further that market definitions are also key in the selection of relevant remedies, as these have to be related to the boundaries of relevant markets. Although both European Union and Kenya promote service and technology neutral licences, introducing the unified licensing framework, they used an approach based on demand/supply side substitutability.

Regarding the remedies, all countries in the benchmark imposed regulatory obligations that relate to the scope of the market, that they have previously defined and there is no one size fits all approach for the selection of the remedies. However, it is clear that the remedies range instead of price control and in some cases obligations to share infrastructure, but always regarding which specific market.

Mobile Telecommunications Limited preferred Approach 4: Demand-side and supply-side substitutability, which would lead to narrower market definitions including separation of fixed and mobile markets as well as retail and wholesale.

4.3 Telecom Namibia Limited

Telecom Namibia Limited questioned, how in the age of convergence the 35% market share will be determined, because some of the IT players who make up the market, are unlicensed and consequently not regulated by the Authority and their financial statements will not be subject to analysis in the determination.

Because of the services and technology neutral licensing regime, infrastructure has become irrelevant, as infrastructure alone cannot determine market power. Telecom Namibia Limited confirmed verbally at the hearing agreement with only defining two markets, a broadcasting market and a telecommunications market.

4.4 The Authority's Response

The industry feedback from the hearing that was held 11 May 2012 was supportive of the proposed market and dominance definitions except from Multi-Choice Namibia and Mobile Telecommunications Ltd.

- Multi-Choice was of the opinion that there is no legal mandate to define dominance for broadcasting.
- Mobile Telecommunications Ltd preferred more detailed market definitions differentiating between retail fixed voice, retail mobile voice and SMS, wholesale leased lines and broadband.
- Mobile Telecommunications Ltd raised in the hearing the interpretation of Section 78(5).

These three concerns are discussed in the sections below.

Market definitions

5. Approach one, set out in the discussion document, has been adopted by the Authority as the most suitable approach for Namibia. The Authority issued service and technologically neutral telecommunications licenses in 2012. The convergence of voice and data services as well as the mix in technologies (mobile, fixed, fixed-wireless) will bring more competition and new products and services to the Namibian market. This requires market definitions that will stand up to the changes that this new converged environment will bring.

The Authority is of the view that Mobile Telecommunications Limited's reference to the EU is not appropriate in this case. In the case of market definitions, market size plays a crucial matter.

Namibia's market is very small compared to EU markets. And the same operators would be dominant in each market segment in any event based on how the section 78(4) of the Act is formulated. This was demonstrated during the hearing held on 11 May 2012.

Two markets result from service and technological neutrality, a telecommunications market and a broadcasting market. Dominance then is determined based on the revenue shares of all licensees.

This simple market definition is suitable for a converged telecommunications sector, it is practical and simple to implement for the Authority and minimizes reporting burdens for licensees. The objectives of the Act with respect to dominant operators can be implemented through licence conditions and regulations. There is thus no need from a regulatory perspective for a more detailed market definition.

Market Power

6. Section 78(5) provides that the Authority must also consider the market power that may be exercised by a competitor of the licensee concerned in order to determine whether any of the matters referred to in subsection 4 will give the licensee concerned, market power. The Authority has determined that any licensee with at least a market share of 35% is able to act independent of its competitors. For telecommunications, this is based on the number of licensees in Namibia. Fewer licensees might require a higher threshold and more licensees a lower threshold.

A licensee is dominant, in terms of the Act, in a market if:

- It has at least 35% of market share based on revenues;
- It controls some infrastructure that is necessary for the provision of the services in question;
- It has dominance in a related market and therefore is able to exercise power in the market for the services in question; or
- It has position in a market in another country or a relationship with providers in another country that can be used to exercise market power in respect of the relevant class of services in Namibia.

In light of this approach, the Authority defines the following two markets in accordance with the Act: Telecommunications Market and Broadcasting Market.

In this document, dominance will only be determined for the telecommunications market. Although the issue of whether the Authority may determine which broadcasting service licensees are dominant absent a specific allegation of abuse has been raised by MultiChoice Namibia (Pty) Ltd, the Authority has not had the opportunity to fully consult all interested parties. Therefore, at this time, market dominance in respect of broadcasting services will not be determined.

In certain matters, the Authority may determine sub-markets and may determine operators other than those identified in these regulations as dominant in those sub-markets. Furthermore, market and dominance definitions will be reviewed from time to time to adjust to market development.

SCHEDULE 2

NOTICE OF DETERMINATION OF DOMINANT POSITION IN THE TELECOMMUNICATIONS MARKET

The Authority defines the telecommunications market in accordance with the Act. In terms of Section 78(4)(a)-(d), the Authority considers any licensee to be dominant if:

- It has at least 35% of market share based on revenues;
- It controls some infrastructure that is necessary for the provision of the services in question;
- It has a dominant position in a related market and therefore is able to exercise power in the market for the services in question; or
- It has a dominant position in a market in another country or a relationship with providers in another country that can be used to exercise market power in respect of the relevant class of services in Namibia.

Table 1 below displays a summary of the evaluation of dominance based on the criteria set out in section 78(4) Mobile Telecommunications Limited and Telecom Namibia Limited are dominant for the telecommunications market because they have such a share of the market that they are able to act independent of their competitors (above 35%).

Table 1: Determination of dominance in the telecommunications market As per the hearing held on 11 May 2012							
Licensee	Type of Licence	Date Licence was first issued	Licensee has at least 35% of market share based on revenues	Licensee controls some infrastructure that is necessary for the provision of the services in question	Licensee has dominance in a related market and therefore is able to exercise power in the market for the telecommunications services in question	Licensee has position in a market in another country or a relationship with providers in another country that can be used to exercise market power in respect of the relevant class of telecommunications services in Namibia	Dominant?
Telecom Namibia Limited	Individual (ECNS and ECS)	11 June 2012	Yes (41.5%)	Yes, owns a CDMA, national backbone, (PSTN), WACS	No	No	Yes

Mobile Telecommunications Limited	Class Comprehensive (ECNS and ECS)	14 March 2012	Yes (52.6%)	Yes, owns a national GSM network and WACS	No	No	Yes
Powercom (Pty) Ltd t/a Leo	Class Comprehensive (ECNS and ECS)	16 June 2012	No (4.7%)	Yes, owns a national GSM Network	No	No	Yes
Wireless Technologies Namibia	Class Comprehensive (ECNS and ECS)	14-Mar-12	No	No	No	No	No
Mwireless (Pty) Ltd t/a Africa Online	Class Comprehensive (ECNS and ECS)	14-Mar-12	No	No	No	No	No
Virtual Technologies Services (Pty) Ltd	Class Comprehensive (ECNS and ECS)	19-Nov-12	Not licenced at time of the hearing and will be included in the next dominance determination				
Wilfred Robert Poser	Class Comprehensive (ECNS and ECS)	15-May-12	Not licenced at time of the hearing and will be included in the next dominance determination				
YFI Technologies (Pty) Ltd	Class Comprehensive (ECNS and ECS)	15-May-12	Not licenced at time of the hearing and will be included in the next dominance determination				
Salt Essential IT (Information Technology) (Pty) Ltd	Class Comprehensive (ECNS and ECS)	12-Dec-12	Not licenced at time of the hearing and will be included in the next dominance determination				

Dominant operators in the telecommunications market are Mobile Telecommunications Limited and Telecom Namibia Limited, who each have more than 35% of market share based on revenue and control some infrastructure that is necessary for the provision of telecommunications service. Powercom (Pty) Ltd t/a Leo is dominant in that it controls some infrastructure that is necessary for the provision of telecommunications services.

Powercom (Pty) Ltd t/a Leo is a dominant operator based on the second criteria, the control of infrastructure based on its national mobile GSM network. Mobile Telecommunications Limited and Telecom Namibia Limited are dominant in terms of the first and second criteria.
